Pay cuts, layoffs marked Q1 for large listed firms, shows data

But FMCG, pharma, IT companies spent more on employees

SACHIN P MAMPATTA
Mumbai, 11 August

The June quarter (Q1) results reflect sharp cuts in employee costs as companies grappled with the effects of the Covid-19 pandemic.

A total of 129 firms out of a sample of 217 had cut employee costs in Q1, shows a *Business Standard* analysis of Capitaline data. This is higher than any of the preceding quarters, shows data going back to March 2019. Each of the preceding quarters showed an increase in overall employee costs, suggesting that some companies had spent more on employees even as others cut back, resulting in an aggregate gain. Q1 showed a break in that trend as more than half the companies opted to rationalise costs.

Deepak Jasani, head of retail research at HDFC Securities, said this reflects pay-cuts in some cases and job cuts in others. Some companies would also have amortised a lower amount of the variable payments they make at the end of the year since business is expected to be slack year-on-year in most sectors.

While the bonus is paid at the end of the year, firms normally provide for it every quarter under their employee costs. This provision would be lower because firms don't expect to pay out bonuses to the same degree at the end of the year. Many manufacturing firms in normal times end up paying double-shift or overtime payments to employees, which wouldn't have happened this time. Some sectors such as pharma saw an increase in employee costs. "In fast-moving consumer goods (FMCG)... there was no need to cut costs... pharma was similar," said Jasani.

Steel, air transport service, and auto firms were among the worst hit

In fact, the data shows that FMCG, telecom, pharma, and information technology were among the major sectors which spent more on employees in the quarter than they did in the March quarter. Demand for each of the segments had shown signs of resilience, with lesser impact on business than some other sectors. Employee costs have risen for each of them.

The worst-hit sectors included steel, air transport service, and automobile. Car sales had fallen in the quarter, even as demand for steel declined with projects on hold. Air travel had come to a halt after the government put in place movement restrictions.

Rituparna Chakraborty, co-founder and executive vice-president at human resource solutions company TeamLease Services, suggested the pain may not entirely be over for employees. "I think the next quarter will also be patchy," she said.

The intent to hire, a measure looked at by TeamLease Services' April-September Employment Outlook Report for 2020-21, has fallen to nearly a fifth of its previous level. "This is the single biggest fall measured over the entire course of the employment outlook reports..."

The small sliver of hiring intent is overwhelmingly for (blue-collar)... workforce and by large businesses, is spread across sectors, and in metros and tier-1 cities," it said. The informal nature of India's workforce has also meant that it has been more vulnerable to economic shocks. "Informal labour across the world has borne a disproportionate brunt of the brute force of Covid-19. This also explains why India has had the steepest fall in intent, alongside Europe, although it fares substantially better than all regions on the net intent to hire," the report added.

Specialised profiles can expect 15% raise: Survey

PEERZADA ABRAR
Bengaluru, 11 August

Covid-19 has not only impacted employment, it has also disrupted the way India Inc rewards talent. Employers are cherry-picking profiles and doling out rewards, according to the TeamLease Jobs & Salaries Primer Report 2020. While salary growth may range from marginally positive to stagnant or even negative, increment for some of the "super-specialised" profiles can go beyond 15 per cent.

According to the analysis, the profiles that will see an increment this year include Hadoop developer in BFSI (banking, financial services and insurance) and animators working in educational services.

"While businesses will stay conservative with salary increments, they have not shied away from rewarding specialised skills," said Rituparna Chakraborty, co-founder and executive vice-president of TeamLease Services. "The 15 per cent increment that firms are willing to offer to specialised profiles is a testimony of this."

Some job profiles have survived with better-than-modest salary growth. Prominent among them are supervisor for seed sales and operations support in agriculture and agrochemicals, senior credit analyst in BFSI, and back-end support executive in BPO and IT-enabled services.

Confidence of professionals on steady rise as Covid curbs ease

The confidence level of Indian professionals is on a steady rise with one in three expecting their personal savings to increase in the next six months, amid easing of Covid-19 lockdown curbs, a survey said on Tuesday.

The LinkedIn Workforce Confidence Index shows that India's overall confidence is on a steady rise, with a composite score of 53, up from 50 in the June 15-28 survey.

The survey is based on responses from 2,899 members from 13 different industries across the weeks of June 29 to July 26.

Top AirAsia officials suspended after pilot alleges safety lapses

The aviation regulator suspended two senior executives at AirAsia India after a pilot alleged there were safety lapses at the airline and subsequently was fired.

AirAsia India's head of operations, Manish Uppal, and head of safety, Mukesh Nema, were suspended for three months, Arun Kumar, chief of Directorate General of Civil Aviation, said on Tuesday in a text message, confirming local media reports.

In a video posted in June that's been viewed more than 6 million times on YouTube, pilot Gaurav Taneja questioned AirAsia's policies on sick leave, landing procedures, and han-

dling of Covid-19. Taneja posts under the username *Flying Beast* and has more than 3.5 million subscribers.

AirAsia counted sick days as mandatory break days for pilots, depriving them of the required rest before flying an aircraft, Taneja said. He alleged that the airline sets targets for pilots to land using a specific fuel-saving approach, which can be more dangerous at certain airports.

BLOOMBERG

INDICATORS SHOW GRADUAL RECOVERY

An analysis of high-frequency data points available till July indicates some encouraging signs of a gradual, though uneven, recovery across different sectors as compared to the collapse seen in April. Retail sales of passenger vehicles and two-wheelers have touched almost 85% and 60% of pre-Covid levels, from a situation of zero sales in April. Comparatively, retail tractor sales grew by 35% YoY in July. The decline in petrol and diesel consumption has also narrowed sharply to 14% and 15%, respectively, on a YoY basis from 60% and 56%, respectively, in April. Select indicators linked to movement of goods like Fastag volumes and e-way bill generation were also encouraging, reverting to 70-75% of pre-Covid levels. However, the recovery in travel and hospitality sectors would take time, given apprehensions regarding travel. This is reflected in the share price of auto and airline firms.
